

## RETRACTION OF ARTICLE

**Eugen Florin Georgescu, Ion Vasile, Ana Claudia Georgescu. Intestinal Pseudo-obstruction – a Rare Condition with Heterogeneous Etiology and Unpredictable Outcome. A Case Report. *J Gastrointestin Liver Dis* March 2008; 17 (1); 77-80**

The Editor-in-Chief has been informed that the above mentioned article has very closed similarities with the article: Intestinal pseudo-obstruction: An uncommon condition with heterogeneous etiology and unpredictable outcome, published by Eugen Florin Georgescu, Ion Vasile, Reanina Ionescu in the *World J Gastroenterol* 2008 February 14; 14 (6): 954-959.

After checking both articles, it was obvious for the Editors that the same case report was presented with much similarity in both journals.

According to the Guidelines of the International Committee of Publication Editors (COPE) and the World Association of Medical Editors (WAME) this is duplicate publication. The decision was taken to retract the article from the *J Gastrointestin Liver Dis*, which chronologically was the second publication. The authors have been informed about this decision.

Monica Acalovschi, MD PhD
