

Erratum for

Probiotics in the Treatment of Inflammatory Bowel Diseases in Adulthood: A Systematic Review. J Gastrointest. Liv. Dis. 2022; 31: 74-84.

A few studies cited in this article assessed a probiotic formulation previously known as VSL#3. Following a legal dispute between the distributors of the product VSL#3 and the inventor of the formula, the term VSL#3 is replaced by the generic name of the formulation „De Simone Formulation“. The product currently known as VSL#3 is not the same formulation as the De Simone Formulation. This change does not affect the study of the article.
